

CALL TO ACTION!

STOP FACTORY FARMING EUROPE'S WEEK AGAINST ANIMAL FACTORIES

DATE: 24-30 NOVEMBER 2025

Faced with the rise of agribusiness and its factory farm system, we have decided to join forces to oppose industrial animal production and defend sustainable farming systems that are localised and respectful of animals, nature and workers.

Let's make November powerful, colourful and say it loud: **PUT AN END TO ANIMAL FACTORIES!**

Film screenings, picnics, photo actions, hikes in nature, online events, demonstrations – there should be no limits to any creative ideas! Activities should be documented, and widely promoted and amplified. Materials and designs will be shared after the summer.

WHAT DO WE WANT?

- We call for a transition of Europe's food and farming system – business as usual is not an option any more.
- We need policy makers and policies that defend the interests of people, animals and the environment.
- We need farms instead of factories
